Your Gateway to Efficient Connectivity

The USBcan Pro 2xHS v2 is a USB to dual-channel CAN or CAN FD interface with scripting capability. With a standard USB connector and two high-speed CAN channels with ISO 11898-2 compliant CAN transceivers in two separate 9-pin D-SUB CAN connectors, it is high-performance, yet compact, and can be used as a simple dual-channel interface to connect two high speed CAN buses to a PC or mobile computer, or can be programmed to do more.

The Pro version is shipped with Kvaser TRX, a lightweight development environment that lowers the bar when starting out programming the device.
