1 About this manual

This manual is intended for Kvaser T-cannector v2 users. This document contains a description of the hardware's properties and functionality.

2 Introduction

This section will describe the functions and features of the Kvaser T-cannector v2.

2.1 Welcome to Kvaser T-cannector v2

Figure 1: Kvaser T-cannector v2

Kvaser T-cannector v2 is a CAN bus hub with three D-SUB9 socket connectors and one D-SUB9 plug connector. Offering an adjustable CAN termination load (connecting an optional termination resistor of $120\,\Omega$ or $60\,\Omega$) the Kvaser T-cannector v2 provides an affordable and safe way of terminating the CAN bus when using Kvaser interfaces on a development board, as well as powering bus powered devices, such as Kvaser's Blackbird, Hybrid, and Memorator series.

Device	Product Number (EAN)

2.2 Major features

- Acts as a CAN bus hub with three D-SUB9 socket, and one D-SUB9 plug, connectors

- Each D-SUB9 has screws to secure the connection to the Kvaser CAN interface

- Adjustable termination via easy-to-use three-way switch

- LED to indicate power on

- Voltage range of 12 - 24 V DC

- A complementary 12 V DC, 1 A power supply is included

3 Kvaser T-cannector v2 hardware

Kvaser T-cannector v2 is a CAN bus hub with three D-SUB9 sockets (see Figure 2) and one D-SUB9 plug connector (see Figure 3).

Figure 2: Pinout of D-SUB9 socket.
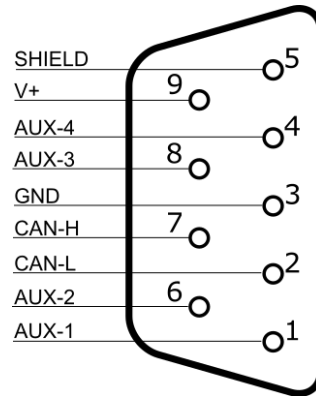

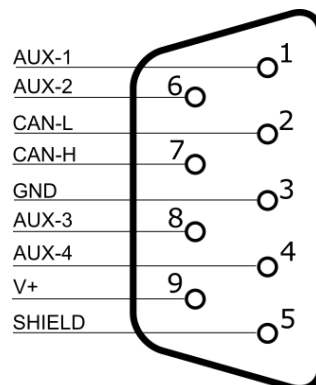

Figure 3: Pinout of D-SUB9 plug.

All pins of these connectors are fully connected, e.g. pin 1 on each connector is connected to pin 1 on all other connectors, see Figure 4 on Page 8.

Pin 9 (V+) and pin 3 (GND) are connected to the power supply. A power indicator LED is connected as shown in Figure 4 on Page 8. The termination resistor is selectable using the three-way switch marked SW.

3.1 Power Distribution

The Kvaser T-cannector v2 may be powered from an external DC power supply, via a 2.1 x 5.5 mm connector, providing a power source for Kvaser CAN interfaces. The Kvaser T-cannector v2 may also distribute power via V+ in any of the D-SUB9 connectors.

3.2 LED Indicators

The Kvaser T-cannector v2 has one red power LED indicator, see Figure 5.

3.3 Termination Adjustment

The Kvaser T-cannector v2 has an adjustable CAN termination that provides an effective way of terminating the CAN circuit. The optional termination of 120 Ω or 60 Ω is selected through a three-way switch, see Figure 5.
